Sommersemester 2018
Unikurse für Flüchtlinge in den Sozialwissenschaften

Im Rahmen der Initiative der Humboldt-Universität
Geflüchteten den Hochschulzugang zu erleichtern
bietet das Berliner Institut für empirische Integrations- und Migrationsforschung (BIM) zwei spezifische Kurse für Flüchtlinge und andere interessierte StudentInnen in den Sozialwissenschaften zu Migration, Raum und Gender an.

2017/2018
Manahajy Jameya laali'ânîn fi 'ilm al-ajam

As a part of Humboldt University's initiative "Refugees as guest students", the Berlin Institute for Integration and Migration Research (BIM) offers two classes for refugees and other interested students in the social sciences on migration, space, and gender. The seminars will be held in Arabic or Farsi as well as in English. The seminars were granted the prize "Menschen mit Hintergrund" by the university of Regensburg and the BAMF.

Places of Migration in Berlin

Berlin is a city of migration with several migrant communities. Acknowledging migration in a city assumes that migration is no longer a deviation but the norm. Migrants and particularly refugees represent an important complexity of the current societies. They engage and contribute to the future of the city through their interactions and imaginaries. In this research-oriented course, we focus on urban spaces to contribute to a cartographic understanding of migration and the spatiality of inclusion in Berlin.

The class is bilingual (English and Farsi/Dari) so students and refugees can share their knowledge about Berlin and discuss inclusion, urbanisation, space and migration in their preferred language. Hence, facilitated by a constant translation, it is a chance for comparing diverse Berlins by alternative approaches such as collective mapping.

This seminar is in line with the previous seminars from Berlin in dialogue initiative at BIM (Berliner Institut für empirische Integrations- und Migrationsforschung) towards a spatial understanding of refugees in Berlin. The course is designed to benefit from the previous participants with refugee background as the facilitator of research in the seminar.

Participants will focus on the places of migration related to a community or a neighborhood, and produce a map as their final assignment. These maps will be presented in the class, so other participants can help and improve them. The final results will be presented on a specific website that is designed for this research-seminar.

Requirements: 1. Active attendance and participation in the discussions. 2. Research and produce a migration map about a community or neighbourhood in Berlin.

Course languages: English and Farsi
Course time: Wednesday: 16:00-18:00 (start: 18 April 2018)
Location: room H 3010 (3L), Main Building of Technische Universität Berlin, Straße des 17.Juni 135, 10623 Berlin
Course tutors: Raana Ghazanfarpour Raana.gh@gmail.com Nader Talebi talebina@hu-berlin.de
